SUMMARY

AI product, technical program, and data platform-focused Engineering Management graduate student at Johns Hopkins University with experience converting user research, technical constraints, data signals, and release metrics into requirements, roadmaps, dashboards, and cross-functional execution. Delivered 84% validation coverage, 26% fewer post-release defects, 95% internal product adoption, and 30% lower data errors across ADAS platforms, data products, and AI-enabled systems.

EDUCATION

Johns Hopkins University, Baltimore, MD

Aug 2025 – Dec 2026

M.S. Engineering Management, GPA: 3.82/4.00

Coursework: Product Management, AI Project Management, Data Engineering, Artificial Intelligence

JSS Science and Technology University (JSSSTU), Mysuru, India

Aug 2019 – Jul 2023

B.E. Computer Science & Engineering, GPA: 8.97/10

Coursework: Machine Learning, Data Mining, Big Data Analytics, Software Engineering, Cloud Computing

EXPERIENCE

Johns Hopkins Technology Ventures, Baltimore, MD

Jun 2026 – Present

Corporate Partnerships Intern – Technology Commercialization

- Improved partnership targeting by mapping Johns Hopkins research strengths to industry priorities, translating technical capabilities into value propositions, market briefs, and partner recommendations.

Mercedes-Benz Research and Development India (MBRDI), Bengaluru

Aug 2023 – Feb 2025

Product Development Engineer – ADAS Platform Software

- Delivered a core ADAS capability across 5+ vehicle platforms by translating stakeholder inputs, diagnostic signals, dependencies, and release risks into requirements, milestones, and execution plans.
- Improved validation coverage to 84% and reduced post-release defects by 26% by building KPI dashboards across 100+ regression tests tracking coverage, defect trends, readiness gates, and milestones.
- Increased release decision quality by analyzing 10K+ validation and diagnostic log entries per release to isolate recurring failures, prioritize high-impact fixes, and support go/no-go decisions.
- Accelerated shipment cadence by 2 days and reduced validation effort by 6+ hours per cycle by standardizing defect triage, escalation paths, release reviews, runbooks, and documentation.

News Technology Services Pvt Ltd (NewsCorp), Bengaluru

Sept 2021 – Nov 2021

Product Development Intern – Internal Data Product

- Reduced structured data errors by 30% for 75+ users by building a Python/Flask CSV-to-database reporting product with schema validation, logging controls, and backend automation.
- Reached 95% adoption within one month and improved reporting performance by 26% by scoping MVP requirements, defining acceptance criteria, and shipping 5+ enhancements.

Present Technologies, IPN Incubator Center Portugal

Jan 2026

Product Strategy & Market Research Analyst

- Improved roadmap and GTM clarity by mapping 6 U.S. soccer ecosystem segments, benchmarking 10+ tools, and synthesizing workflow gaps into personas, positioning inputs, and product recommendations.

PROJECTS

TrustShield AI – Trust & Safety Decision Support Platform

AI Product, Risk Scoring, HITL

- Strengthened moderation operations by designing an AI-assisted console with risk signals, reviewer queues, policy controls, human overrides, and analytics for trust and safety decisions.

Campus Atlas – AI Student Experience Platform

React, Express, RAG, Evaluation

- Improved AI answer reliability by building a full-stack command center with citation-backed retrieval, confidence thresholds, human escalation, and metrics for groundedness and deflection.

Cross-Continental Eco-Economic Data Platform

Python, PostgreSQL, Flask, Docker, APIs

- Enabled analyst-ready climate and market insights by integrating disaster, commodity, and macroeconomic indicators across 5 countries and 4 APIs into PostgreSQL with a Flask API layer.

LEADERSHIP

TEDxJHU Speaker – Executive communication

Bureau Club, JSSSTU – Social Media Head, 40% engagement growth

Linux Campus Club, JSSSTU – Student Coordinator

SKILLS

Product/Program: Discovery, PRDs, Roadmaps, Prioritization, KPIs/OKRs, GTM, Release Readiness, Risk Tracking ·

AI/Data/Tech: AI Product, RAG, Model Evaluation, ETL, Data Pipelines, Product Analytics, SQL, Python, Flask, APIs, PostgreSQL, Docker, React, AUTOSAR, CANoe, HIL, Jira, Confluence, GitHub
