SUMMARY

Product and Technical Program Manager candidate (Johns Hopkins M.S. Engineering Management) with former Mercedes-Benz ADAS experience driving integration and release execution across 5+ vehicle platforms; builds AI, data, and operations products with human review built in. Delivered 84% validation coverage, 26% fewer post-release defects, and 95% adoption of an internal data product.

EDUCATION

Johns Hopkins University, Baltimore, MD

Aug 2025 – Dec 2026

M.S. Engineering Management, GPA: 3.82/4.00 · Teaching Assistant · TEDxJHU Speaker (2025)

JSS Science and Technology University (JSSSTU), Mysuru, India

Aug 2019 – Jul 2023

B.E. Computer Science and Engineering, GPA: 8.97/10

EXPERIENCE

Mercedes-Benz Research and Development India (MBRDI), Bengaluru

Aug 2023 – Feb 2025

Product Development Engineer – ADAS Platform Integration

- Drove integration and validation delivery across 5+ vehicle platforms, coordinating platform, diagnostics, hardware, and validation teams around software baselines, regression gates, and release criteria.
- Tracked milestones, dependencies, technical risks, and readiness across 100+ automated regression tests; improved validation coverage to 84% and contributed to a 26% reduction in post-release defects.
- Acted as the change-impact gate for the AUTOSAR basic software stack on AURIX, integrating components from all module teams and driving boot, reset, and communication failures to closure with CANoe and TRACE32.
- Standardized defect triage, escalation, and release evidence; cut cycle effort 6+ hours and shipment delays 2 days.

Mercedes-Benz Research and Development India (MBRDI), Bengaluru

Apr 2023 – Jul 2023

Software Integration Intern

- Built C++ unit-test and code-coverage infrastructure with GoogleTest, Bazel, and gcov/lcov, raising module coverage to 95% before system-level validation.

News Technology Services Pvt Ltd (NewsCorp), Bengaluru

Sept 2021 – Nov 2021

Product Development Intern

- Defined requirements and success metrics for an internal data product; built Python/Flask workflows for 75+ users.
- Prioritized 5+ enhancements from user feedback: 95% adoption in one month, 30% fewer data errors.

Johns Hopkins Technology Ventures, Baltimore, MD

Summer 2026

Corporate Partnerships Intern

- Mapped JHU research capabilities to industry priorities in emerging life sciences for corporate partnership strategy.

Present Technologies, IPN Incubator Center, Portugal

Jan 2026

Product Strategist and Analyst

- Mapped U.S. soccer technology across 6 competitive levels, evaluated 15+ tools, and defined 3 personas for a GTM report.

PROJECTS

TrustShield AI – AI Trust and Safety Decision Layer

- Built a React moderation-console prototype (8 risk signals, human review); scored 7 market spaces, repositioned to the review decision layer, and wrote the v2 PRD, decision log, and north-star metric (high-risk recall within a fixed review budget).

Campus Atlas – AI Copilot for Higher Education

- Designed a citation-first campus copilot with confidence-gated escalation; built an offline eval harness that surfaced a crisis-response gap, fixed the routing logic, and moved the labeled test set from 10/12 to 12/12.

LabOps Intelligence – Engineering Portfolio Planning

- Built a planning tool linking 24-month engineering demand to lab capacity, 12 projects, budget, risk, and approvals.

Lead Intake and Routing Copilot – AI Sales Operations

- Built a FastAPI lead-intake system where AI proposes intent while versioned rules and 10 control checks route or hold each lead; shipped exception review, audit trails, a threshold simulator, and 47 automated tests.

Cross-Continental Eco-Economic Data Pipeline – Data Platform (4-person team)

- Built the Docker, scheduled refresh, and Flask API for a 4-source, 5-country warehouse; wrote the spec.

Product Strategy – KaraOrchee, NviGo, Bloomberg Children's Center (Johns Hopkins Hospital)

- Ran 50+ interviews: 85% willingness to pay (KaraOrchee), housing chosen as Phase 1 across 5 countries (NviGo), 15% reported delay reduction (Bloomberg).

SKILLS

Product and Program: PRDs, roadmaps, prioritization, KPIs, dependency and risk tracking, release readiness, GTM

AI, Data, Tools: human review design, eval harnesses, Python, SQL, REST APIs, PostgreSQL, Docker, Jira, AUTOSAR, CANoe, HIL
